

Control As You Like It.

Only Telos offers a variety of control surface options featuring Telos' exclusive Status Symbols to easily observe the status of each caller at a glance.

Call Controller

The Telos Call Controller; a simplified and cost effective option for call screening and on-air control. The Call Controller connects to the Nx12, 2101, or TWOx12 in the same way as the Desktop Director. It uses an external, user provided, telephone for call screening and studio telephone operation. Simply connect the Call Controller to the Nx12, 2101, or TWOx12, plug in any compatible analog telephone and you're on your way.

Like all Telos control options for the Nx12, 2101, or TWOx12, the Call Controller has large buttons and intuitive Status Symbols to keep track of line and hybrid status, and whether a caller has been screened. Convenient keyboard shortcuts may be used to switch between on-air control, and screener modes. There are additional keyboard shortcuts permit full support of the TWOx12's, new version 3.0 split modes (dual studios) in conjunction with our series 2101 Multi-Studio Talkshow Systems.

Desktop Director

Exclusive Telos Desktop Directors (sophisticated, yet easy-to-use, control stations) make fast-paced production a snap. And caller management has never been simpler, thanks to Telos Status Symbols, clear, easy to read graphical icons that convey line and caller status at a glance.

Desktop Director helps you screen calls quickly and efficiently using deluxe features like the built-in handset, speakerphone or optional headset. Hosts receive immediate information about line availability, on-hold and ready-for-air queue status from intuitive, graphical Status Symbol icons. An extended version can control up to 24 lines or four hybrids.
